

EasyRobotics ProFeeder

- we move your parts

Makes it simple to get started with robot automation

- Can store parts for an entire shift.
- Can be quickly moved to a new station with pallet truck.
- Easy to set-up - just connect to electricity and air.
- Compact design allows easy access to the CNC machine.
- Can be used with most types of processing machines.
- Robot arm can be placed on three sides of the cell.

The ProFeeder from EasyRobotics is a compact modular robot cell, prepared for the installation of a robot.

The ProFeeder modular system can be expanded in 3 step, from production automation of a small series that can be quickly changed, to the full automation of a large production series.

1

ProFeeder Light

1 parts tray, the basic module is suitable for small series production.

2

ProFeeder

2 parts trays, 2 movers and automatic centring of parts tray. Suitable for small and medium series production.

3

ProFeeder Multi

4 parts trays, 2 movers and 1 automatic lift module. Suitable for series production in fully automated 4-shift operations.

ER5

Max mobility and flexibility

The ER5 series from EasyRobotics is a series of mobile cobot platforms developed to maximise mobility and flexibility in robotic automation.

ER5-Work

Patent pending and registered design

Suitable for:

Maximising mobile and flexible robotic automation in dense facilities.

UR3 and UR5 collaborative robots from Universal Robots.

Optional features:

Easy+ Software program for convenient set-up.

Interchangeable parts plate.
